The user has to find in the image the animal/object either starting or containing the sound pronounced by Mahv. For example, Mahv pronounces oa, oa, oa
The user has to find a boat in the image
The system highlights the animal/object the user cannot find it after 30 seconds

1

It's colouring time!

Mahv asks the question to the user.

Vowels

number of letters

4

The user colours the chosen picture

3

Colours
The user can choose the size of the nib

2

Colours
The user can choose a colour from the palette

Letter tricky words

Swipe the fan and see what there is inside!!

Mahv asks the question to the user.

Tricky words

number of letters collected

The system moves each tricky word into the letter box

The aim of this game is to discover the words hidden in the fan

The user swipes the sticks/spokes of the fan from right to left
The system shows the words written in each stick
Mahv pronounces the word
The user swipes another stick from the fan
The system shows the words written in each stick
Mahv pronounces the word
and so on until the last word is discovered

This is a fan

Letter tricky words1

Touch my hat and see if you can find the missing word!

Mahv asks the question to the user.

Tricky words

number of letters collected

The system moves each tricky word into the letter box

2

Correct

Wrong

The aim of this game is to find the missing word in the sentence presented to the user

The user touches Mahv's hat

The system shows a word coming out from the hat
Mahv pronounces all words of the sentence, including the new word

Mahv asks the user

"Is this the correct word?"

If yes, drag it to the dotted line.

If not, drag it back to the hat and find another word"

The user drags the word into the correct position if it's correct

Letter tricky words2

1

Count how many time you can see a particular word and then colour the table!

Mahv asks the question to the user.

Tricky words

number of letters collected

The system moves each tricky word into the letter box

3

3

Colours
The user chooses a colour from the 6 presented

Colours
The user can choose the size of the nib

In this box there are six tricky words repeated maximum four times

2

The aim of this game is to count how many times a word is written in the top table and colour the squares in the table underneath

The user touches a word
Mahv pronounces the word
Mahv asks the user "How many "name of the word" can you find?"
The user counts how many times the chosen word is repeated
The user colours the number of square in the bottom table
